**The Imbalance Cost Pass-Through (ICPT) Tariff Surcharge in Kulim Hi-Tech Park from 1<sup>st</sup> January 2026 to 30<sup>th</sup> June 2026.**

On 24<sup>th</sup> December 2025, the Government of Malaysia ("GoM") have announced a new Imbalance Cost Pass-Through ("ICPT") for Kulim Hi-Tech Park ("KHTP").

2. Targeted application of ICPT for customers in Kulim Hi-Tech Park for the period between 1<sup>st</sup> January 2026 and 30<sup>th</sup> June 2026 are as follows:

- i. Domestic customers with electricity consumption of 1,500 kWh and below (<1,500 kWh) will not be charged any surcharge and the tariff will be maintained as NUR's domestic user rate and tariff block.
- ii. Domestic consumers with electricity consumption exceeding 1,500 kWh (>1,500 kWh) will be charged the ICPT surcharge at the rate of **6.43 sen/kWh**.
- iii. Non-domestic users will be charged a surcharge at the rate of **6.43 sen/kWh** for all electricity units consumed.

3. The ICPT mechanism is a part of an Incentive Based Regulatory ("IBR") framework, where basic electricity tariff rates for each Regulatory Period (RP) are determined by setting the price of fuel benchmarks during that period. Any actual cost difference against the fuel benchmark in the tariff setting will be adjusted every six months under the ICPT mechanism in the form of surcharges or rebates depending on fuel and other generation costs during that period. The impact of ICPT implementation is neutral on NUR and does not have any effect on its business and financial position.

4. Please contact the undersigned below if you require any further clarification on this matter.

Thank you.

Yours sincerely,

Khairil Azman Ismail
